

**Do You Know This Man?
You Should
If You Or Anyone You Know
Are Fighting
Disease, Chronic Illness,
And Especially Cancer**

**Dr. Otto Warburg
Nobel Prize Winner**

This world renowned scientist was considered and had the honor of being known as one of the twentieth century's leading medical biochemists.

He received 46 nominations for the NOBEL PRIZE over a nine year period and was nominated an unprecedented three times for the Nobel Prize for three separate achievements.

HE WON THE NOBEL PRIZE For his discovery of "the nature and mode of action of the respiratory enzyme." This was the most important scientific medical discovery in all of history. His scientific discovery fully defined the ROOT CAUSES of ALL disease especially cancer.

He was a member of the Royal Society, London and a member of the Academies of Berlin, Halle, Copenhagen, Rome, and India. He has gained l'Ordre pour le Mérite, the highest order of merit for extraordinary personal achievement, the Great Cross, the Star and Shoulder Ribbon. In 1965 he was made doctor honoris causa at Oxford University.

Dr. Warburg proved to the world and the worldwide medical system with undeniable factual scientific proof of HOW, WHAT, WHYS, WHERE AND WHEN all manner of disease and especially cancer BEGINS and GROWS in the human body. Today this proof is still so substantially solid, there is not a single scientist or doctor that can dispute or disprove his findings.

In 1966 during a speech before a gathering of Nobel Prize Winners Dr. Warburg made the following profound statements about his discovery adding insight about the simplistic approach to fighting against disease and cancer that is available to everyone.

1. **"Unlike the prevention of many other diseases, the prevention of cancer requires no government help, and not much money."**

WHAT? There is a reason many people have not heard of Dr. Warburg. This document is not a conspiracy theory about why you may not have heard of him, but, more of a simple factual understanding of what this amazing man discovered. For Dr. Warburg to make such a claim that the prevention of cancer does not require government assistance and not much money makes one wonder how we reached the One Hundred Thousand Dollars PLUS Chemo chemical treatments of our day.

2. **"Why then does it happen that in spite of all this so little is done towards the prevention of cancer? The answer has always been that one does not know what cancer or the prime cause of cancer [might] be, and that one cannot prevent something that is not known. But nobody today can say that one does not know what cancer and its prime cause [may] be. On the contrary, there is no disease whose prime cause is better known, so that today ignorance is no longer an excuse that one cannot do more about prevention. That prevention of cancer will come there is no doubt, for man wishes to survive."**

As you can hear from his words he was a bit agitated with the stagnation of the medical system to IMPLEMENT his discovery. WHY has so little been done to prevent cancer he asked. We used to say that we don't know what causes cancer, and besides how can we prevent something that is unknown? TODAY no one can say we do not know, on the contrary, there is NO disease as cancer better known. We cannot be ignorant any longer and make excuses why we are not preventing cancer. We can do more to prevent cancer TODAY because we know the PRIMARY CAUSE of cancer.

3. "There are prime and secondary causes of diseases. For example, the prime cause of the plague is the plague bacillus, but secondary causes of the plague are filth, rats, and the fleas that transfer the plague bacillus from rats to man. By the prime cause of a disease, I mean one that is found in every case of the disease.

Cancer, above all other diseases, has countless secondary causes. Almost anything can cause cancer. But, even for cancer, there is only one prime cause. The prime cause of cancer is the replacement of the respiration of oxygen (oxidation of sugar) in normal body cells by fermentation of sugar."

Cancer can come from many secondary causes, asbestos, chemicals, pollution, pesticides, smoking, and even a polluted food supply. (This was the first explanation of the term FREE RADICALS that we use today.) Another world renowned scientist today in Berkley Dr. Lester Packer Ph.D., along with a very select group of scientists claim that ALL DISEASE begins with a free radical attack at the cellular level. Dr. Packers work validates Dr. Warburg. Pointing us again in the direction of infusing our body with oxygen. There is never a better time than NOW to keep our body in an alkaline state. Our medical system today is geared to treat symptoms when we should be about preventing the root CAUSE.

We now know that cancer has only one primary cause and it starts at the cellular level. When a single cell loses oxygen (from a free radical attack) it turns acidic and is no longer able to breath like normal cells. The cell enters what is known as an anaerobic (living without oxygen) state and is only able to obtain energy through molecules containing glucose sugar effectively living without oxygen.

4. "In every case, during the cancer development, the oxygen respiration always falls, fermentation appears, and the highly differentiated cells are transformed into fermenting anaerobes, which have lost all their body functions and retain only the now useless property of growth and replication. Thus, when respiration disappears, life does not disappear, but the meaning of life disappears, and what remains are growing machines that destroy the body in which they grow."

As cancer develops it FIRST begins with the loss of oxygen in a cell. This anaerobic cell living without oxygen becomes useless to all normal body functions. These useless cancer cells grow and replicate when the respiration of oxygen disappears from a single cell. At that very moment, when a cell loses oxygen, life does not disappear (we do not notice what has happened) but instantly the meaning of life disappears from our body. What remains are tumors and growing machines of destruction that begin to seek and destroy the very body where they are growing.

5. All carcinogens impair respiration directly or indirectly by deranging capillary circulation, a statement that is proven by the fact that no cancer cell exists without exhibiting impaired respiration. Of course, respiration cannot be repaired if it is impaired at the same time by a carcinogen. Every person who has cancer has a pH that is too acidic. No disease including cancer can exist in an alkaline environment.

Every agent (free radical attack) that is directly involved in causing cancer does so by disrupting the blood vessels delivering oxygen to the cells. This is a medical fact that no cancer cell can exist without showing decreased oxygen breathing. You cannot repair the impaired breathing of oxygen by a cell, if the cell remains under attack by free radicals. Therefore, every person fighting cancer has a pH level that is too acidic. However this we know, NO disease including cancer can grow or exist in an alkaline pH environment.

How Do We Prevent Cancer And How Can We Fight Back?

Can We Actually STOP Free Radical Attacks?

6. "To prevent cancer it is therefore proposed first to keep the speed of the blood stream so high that the venous blood still contains sufficient oxygen; second, to keep high the concentration of hemoglobin in the blood; third, to add always to the food, even of healthy people, the active groups of the respiratory enzymes; and to increase the doses of these groups, if a precancerous state has already developed. If at the same time exogenous carcinogens are excluded rigorously, then much of the endogenous cancer may be prevented today."

(ONE) Make sure your blood circulation is moving freely to all destinations throughout your body. By circulation we mean the smallest veins are receiving as much oxygen transporters as found in the larger veins. No known clogs, parasites, or plaque buildup. We are not talking about blood pH but about hydrogen infused blood carrying extra oxygen to disarm free radicals and supplying all of the cells with oxygen. There are other simple therapies that can be done if you suspect metal content in your blood. There are blood tests that can check your metals levels. Other therapies from chelation, H₂O₂ and vitamin c drips that are excellent ways to improve vein circulation health and extra oxygen.

(TWO) Hemoglobin is the oxygen transporting agent in the blood. You can tell when the blood is full of oxygen it will appear bright red in color. In a lesser state blood will appear reddish purple-blue in color. REAL Hydrogen Infused alkaline water is the most powerful of all antioxidants in the world. It surpasses all foods and supplements. It is the simplest, cheapest and most effective way to add tons of oxygen to the hemoglobin transporting system. There are a few good supplements that will aid in the delivery of the oxygen as well as help to boost your immune system. (Germanium, artemisinin, organic barley enzymes, Beta-1,3d Glucan) BTW 80% of your immune system is located in your gut.

(THREE) Increase the amount of oxygen in the blood. If an unknown or known pre-cancerous cell has already developed due to an external attack (by a free radical attack) on the body's cells you must fight back against the attack with your whole heart by adding more oxygen to your blood. Who would have thought that by drinking a glass of water would be the simplest, cheapest and the most effective way to add tons of oxygen to the hemoglobin transporting system. I am sure Dr. Warburg would have loved to see the invention of an ION Alkaline water purifier.

If you will do this then most of the cancers today may be prevented.

7. "These proposals are in no way utopian. On the contrary, they may be realized by everybody, everywhere, at any hour. Unlike the prevention of many other diseases, the prevention of cancer requires no government help, and not much money."

This is not some unobtainable idealistic philosophy this is real factual science and everyone in the world can start at any time during their life to inherit the benefits. You do not need government help or a lot of money to fight against cancer and prevent it in your body. Infuse your body with oxygen, fight against free radical attacks every day. As a whole if we will take the steps to PREVENT cellular problems before they begin we can PREVENT cancer before we have an unknown environment in our body where cancer can grow undetected for years.

Older adults need to reverse the acidic condition in their body from years of poor eating and drinking. Parents can give today's children a huge advantage in life by changing their water you can change their world for the future.

8. “Many experts agree that one could prevent about 80% of all cancers in man, if one could keep away the known carcinogens from the normal body cells. But how can the remaining 20%, the so-called spontaneous cancers, be prevented? It is indisputable that all cancer could be prevented if the respiration of body cells were kept intact.

There are many scientists and doctors today that agree that if we can keep away the free radicals from entering our body we could prevent about 80% of all cancer. But what about the other 20%? Solid medical science proves that we can prevent the other 20% making ALL cancer preventable if we keep oxygen supplied to the body's cells.

9. Nobody today can say that one does not know what the prime cause of cancer is. On the contrary, there is no disease whose prime cause is better known, so that today ignorance is no longer an excuse for avoiding measures for prevention. That the prevention of cancer will come there is no doubt. But how long prevention will be avoided depends on how long the prophets of agnosticism will succeed in inhibiting the application of scientific knowledge in the cancer field. In the meantime, millions of men and women must die of cancer unnecessarily.

There is not a scientist or medical doctor alive today that can say they do not know the primary cause of cancer. To do that would be to deny the principals of solid scientific fact. In fact there is no disease that is better known by the medical world so they cannot claim ignorance or make excuses to avoid taking the right measures to help people prevent cancer.

The prevention of cancer will come, but how long will the fortune-tellers of skepticism and doubt in the medical world succeed in denying the application of these solid scientific facts in preventing cancer? While the medical establishment continues to deny the facts about the primary cause of cancer and avoids telling people the simple way to prevent cancer millions of men, women, and children will needlessly DIE of cancer without cause. You should be angry.

The medical establishment along with the rich powerful pharmaceutical companies have no reason to tell you about what NOBEL PRIZE winner Dr. Warburg discovered, or the newest discovery by Dr. Packer. They treat disease and sickness based on the symptoms, not at the root primary cause that is causing the symptom. Most doctors perform like programmed PEZ dispensers who work for the pharmaceutical industry dispensing their latest creation “here I have a pill for that.” (Don't worry about the 35 crazy side effects) THERE ISN'T ANY MONEY THAT CAN BE MADE FROM DR. WARBURG'S DISCOVERY. It is too easy and too cheap to fill your body with oxygen every day. This is why he said we do not need government help, and not much money. It takes something as simple as a glass of hydrogen infused ION alkaline water neutralizing free radicals attacks in their tracks.

Think about what you want to do. You can PREVENT CANCER by fighting the PRIMARY CAUSE NOW or end up treating the devastating symptoms later.

Remember, “No disease including cancer can exist in an alkaline environment”

A fellow cancer survivor living on scientific fact, and putting oxygen in my cells every day.
